Waste Warriors Society   *06/2023 - 07/2023*

- ○ Participated in awareness campaigns and data collection initiatives focused on sustainable waste management.
- ○ Collaborated with a multidisciplinary team to plan and execute community outreach programs.
- ○ Edited video content and presentations to support educational outreach.

PROJECTS

Personal Vulnerability Scanner   06/2025 - 06/2025
Github

- ○ APython-based network scanning tool that automates the detection of open ports, running services, and potential vulnerabilities using Nmap integration.
- ○ It scans IP addresses or domains and generates detailed reports of exposed services, helping identify security weaknesses.
- ○ Designed for ethical use on Kali Linux to simulate real-world vulnerability assessment.

Personal Portfolio   04/2025 - 06/2025
Github

- ○ Designed a modern, responsive personal portfolio inspired by Apple's minimal and elegant design language.
- ○ Implemented using HTML, CSS, and JavaScript, focusing on smooth animations, layout symmetry, and mobile responsiveness to enhance visual appeal across all devices.

Password Strength Checker   02/2025 - 03/2025
Github

- ○ Built a responsive password strength checker using HTML, CSS, and JavaScript, providing real-time feedback on password quality based on complexity, length, and character variety.
- ○ Implemented dynamic UI elements to visually indicate strength levels (e.g., weak, moderate, strong), enhancing user experience and engagement.
